

The World's Most Trusted Industrial Torque and Tension Systems

BACK-UP WRENCH

Square Drive Torque/Tension Wrench

- Counter-nut does not rotate with nut; easy and fast
- Interchangeable spanners from 1-3/16 / 30mm to 3-5/32 / 80mm (max. 3,983 ft.-lbs./5,400 nm)
- Work faster, safer, and more efficiently than with other methods!
- No hammer necessary for removal, increasing productivity and safety
- Hands-free operation eliminates possible pinch points, increasing safety on the job

Place the Back-Up Wrench on the counter-nut, then tighten the nut with a torque wrench. When torquing is complete, remove the Back-Up Wrench from the counter-nut. Speed of work will also increase significantly when compared to removal methods using a hammer and slugging wrench.

Using our Back-Up Wrench also makes the torquing process Hands-Free, eliminating possible pinch points.

Removal of the Back-Up Wrench does not require the use of a hammer, Making removal very easy and much safer than other methods.
